

In the Claims:

Please rewrite Claims 1, 8 and 15 as follows:

507  
A1 B1

-- 1. (Amended) A browser equipped telephone capable of displaying a web page by a browser comprising:

- an inputter which inputs a URL of a web page;
- a transmitter which transmits the URL inputted by said inputter in a form that can be distinguished from a voice message;
- a receiver adapted to receive a URL and associated voice message transmitted from the outside through an incoming telephone call;
- an answerer which records and reproduces the URL and associated voice message received by said receiver; and
- a decoder which converts into a character format and sends to said browser said URL reproduced by said answerer.—

A2 507  
B1

-- 8. (Amended) In a browser equipped telephone capable of displaying a web page by a browser, a method for recording a URL of a web page in an answering mode, comprising the steps of:

inputting a URL;

transmitting said URL in a form that can be distinguished from a voice message;

receiving a URL and associated voice message that are transmitted from the  
outside through an incoming telephone call;

recording and reproducing the received URL and associated voice message; and

converting the reproduced URL into a character format and providing it to said

browser.—

A2  
Concl

---

A3 5/7  
B1

-- 15. (Amended) A program storage device readable by machine for tangibly  
embodying a program of instructions executable by said machine to perform, in a browser  
equipped telephone capable of displaying a web page by a browser, a method for  
recording a URL of a web page in an answering mode, comprising the steps of:

inputting a URL;

transmitting said URL in a form that can be distinguished from a voice message;

receiving a URL and associated voice message that are transmitted from the  
outside through an incoming telephone call;

recording and reproducing the received URL and associated voice message; and
